SPORTS SEATS

SPORTS SEATS COMPACT

PERFORMANCE WITH CUTTING-EDGE DESIGN

Everything under control? The driver's seat plays a key role in this - especially when the car is being driven in a sporty manner. The better your sitting position, the better your reactions and the more fully you have the vehicle under control. That's why we build sports seats that adjust perfectly to your body – so that you can concentrate better and drive even more safely.

In our seats we bring together the best of over 100 years of our company history with over 40 years of experience in professional motorsport, e.g. in ALMS, WTCC, WRC, DRM, the ADAC GT Masters, GT3 and endurance racing.

We incorporate this comprehensive knowledge into our development of sports seats for road cars, thus giving us a competitive edge in relation to seat performance that you can take advantage of in your vehicle. The sportier your driving style, the more important it is that your concentration levels are high – to achieve that, everything in the car has to be right. That's where RECARO seats really impress. Their ergonomically designed form gives the driver optimum support and thus a direct feel for the road.

Strong lines, optimum form, individual styling and exclusive looks – a RECARO sports seat combines maximum sporting flair and cutting-edge design. Accept no compromise! Give your car a new profile and enjoy the experience of sitting in a very special kind of seat.

MAXIMUM SPORTING FLAIR IN ULTRA MODERN DESIGN

It is not just ergonomics and comfort that make a genuine RECARO seat the great product it is – above all it's also the unique, sporty look of our seats, the high quality materials and the excellent standard of finish. Diverse influences drawn from developing seats for road cars and motor racing have shaped the appearance of our sporty product range: from comfortable to dynamic. The choice is yours!

RECARO Speed

Highlight:

- Sports seat at an entry-level price.

Product benefits:

- Suitable for 3- and 4-point belts.
- Backrest angle adjustable with millimetre precision.
- Pronounced seat cushion and backrest side bolsters for perfect lateral hold
